#### 1. Nature of the tasks

Unit HOME.B.2 Schengen Governance leads on the work underpinning the governance of the Schengen area, protecting the application of the Schengen acquis, and promoting its further development. ‘Schengen’ is one of the biggest achievements of European integration, which lies at the heart of the area of freedom, security and justice without internal frontiers.

In addition, the Unit is responsible for the annual report of the state of the Schengen area, which is a new key Commission deliverable reinforcing the political governance of the Schengen area. The report, underpinned by a scoreboard, presents a strategic and integrated assessment of the implementation of the Schengen acquis and the Schengen area, thematic and country-specific priorities ahead. The report is presented to the European Parliament and the Council in the Schengen Forum, and political follow-up is ensured through the ‘Schengen Council’

The Seconded National Expert will be responsible to define, implement and co-ordinate policy, legislative and operational developments regarding the governance of the Schengen area, and in particular the application of the Schengen Evaluation Mechanism.

The Seconded National Expert shall not represent the Commission in order to make commitments, financial or otherwise, or to negotiate on behalf of the Commission.

The Seconded National Expert will coordinate the preparation of Schengen evaluations for a number of Member States and participate as Commission expert in Schengen evaluation missions. The Seconded National Expert will liaise with other policy units and the authorities of the Member State concerned. The Seconded National Expert will also contribute to the preparation, adoption and follow-up of the specific Schengen evaluation report, including support to prepare and adopt the relevant recommendations and support to presentations at the Schengen Committee meetings and the Council of the European Union.

The Seconded National Expert will contribute to the development of the Schengen Evaluation training programme as well as to the development of the Scheval Work Programme. The Seconded National Expert will, under the supervision of a Commission official, also assess the relevant HOME-funds national programmes of the Member States and related EMAS applications. The Seconded National Expert will also be the correspondent for data protection evaluations with DG JUST.

#### 1. Nature of the tasks

TAXUD/A3 is the unit responsible for risk management and security in the area of customs.

The successful candidate will be part of the team responsible for the EU Authorised Economic Operator (AEO) Programme and will support the implementation and further development of the programme within EU customs policies. AEOs are traders who voluntarily meet a wide range of criteria and work closely with customs to assure the common objective of supply chain security. The AEO programme subsequently allows customs risk management to treat AEOs as 'low risk traders' and thereby allowing customs to shift their focus and resources on high-risk areas.

In line with the Customs Action Plan (CAP), one of the main objectives is to step up the integrity and robustness of the EU AEO programme as a quality standard and to enhance the harmonious application the AEO provisions throughout the EU. Moreover, many ongoing initiatives may tangibly influence the current design of the EU AEO concept. For example, the follow up to the UCC evaluation, the recently launched AEO study, relevant recommendations by the wise persons group (WPG), as well as the findings and recommendations from the recently launched AEO audit by the European Court of Auditors and the Reflection Group on the future governance of EU customs may lead to legislative amendments and a new design of the EU AEO concept. The aforementioned initiatives and thought-processes may also lead to a more stringent approach with regard to the already existing multi-layered risk based approach of the AEO programme. They are also expected to lead to promoting a 'system based approach' (SBA) within AEO concept towards more security, safety and compliance based on trust, on the one hand, and more tangible benefits, on the other. Finally, leveraging the AEO programme to contribute to the 'European Green Deal', and to promote global standards regarding environmental and social compliance is sought.

<sup>1</sup> These mentions are given on an indicative basis only (Art.4 of the SNE Decision).

The successful candidate will contribute to the further development of the programme, in particular by processing the recommendations from the various aforementioned activities and thought processes. He/she will support preparing draft legislative amendments regarding the AEO programme and developing accompanying guidance. The successful candidate will support the management and developments concerning Economic operator System EOS and eAEO, and will prepare AEO statistics based on EOS data. His/her tasks will also include contributing to the Customs Union Performance (CUP) on AEO and further developing AEO related CUP performance indicators allowing measuring results on monitoring, but also better demonstrating the AEO quality levels versus non AEOs with regard to the treatment / benefits and compliance with the legislative requirements. The successful candidate will also work in the area of cooperation with other government authorities (OGA). This may involve exploring areas of cooperation on environmental and social compliance. Lastly, the successful candidate will support the work regarding the comparison of 3rd countries' legislation, possibly including the technical aspects of the AEO mutual recognition negotiations with 3rd countries.
