Yangon International Airport Cargo Terminal	Tel: +95 1 9640299	200,000	N/D

OBSERVATIONS:

1. To carry out the test, it is advisable to have a letter from the Embassy to secure an appointment (there have been cases of previous appointments also without said letter, although it depends on availability and the center's workload).
2. The certificate with the results of the test is received between 24 and 30 hours after the completion of the test, and is issued in English, with identification data (including name, passport number and date of birth) of the person concerned and indicating the date of completion.
3. In all cases it is recommended to book in advance.

IMPORTANT NOTICE:

This list has the sole purpose of providing information support to travelers and does not constitute an exhaustive list of centers that perform diagnostic tests of active infection for SARSCoV-2 PCR in the consular area. Therefore, certificates from other centers not included in this list are admissible, provided they meet the health requirements established in the Resolution of November 11, 2020, of the General Directorate of Public Health.

The centers included in the list have no connection with the Embassy, which is not responsible for the work carried out by them.
