Entity Presentation (We are)

The mission of Eurostat's unit C.4: Price statistics. Purchasing power parities. Housing statistics is to provide the European Union with high quality consumer price indices, purchasing power parities and real estate price statistics. The unit aims at publishing comparable, reliable and timely statistics in the three domains and further developing

statistical standards, methodology and production processes in collaboration with Member States, other partner countries and international organisations. The unit has 22 staff members.

In the domain of real estate statistics, where the vacancy is, the unit produces the house price index and other related indicators. Further information about the domain is available here: <https://ec.europa.eu/eurostat/web/housing-price-statistics/overview>. Eurostat is currently developing the related topic of commercial real estate statistics. The work in the real estate statistics domain is very important and visible.

Job Presentation (We propose)

We are offering the position of Statistical Officer – Real estate statistics who will be a member of the team responsible for real estate statistics and work under the supervision of a Commission administrator. The team is currently composed of 3 persons.

Our future colleague will contribute to the methodological, data analysis and data production work of the team. More specifically, he/she will take a lead role for methodological developments and improvements in data sources. Drafting a methodological manual on commercial real estate and exploring the use of privately held data to produce house price indices are two examples of on-going projects where contribution will be requested. Furthermore, he/she will contribute to the quality assessment of statistics and compliance monitoring in the domain.

Specific tasks will include drafting and/or implementation of the harmonised methodology, conducting in-depth quality analysis and checks and assisting the colleagues engaged with data production and dissemination. The colleague will draft or review statistical text, guidelines, publication and prepare quality reports in the domain. He/she will present matters to the Commission's Working Group on Real Estate Statistics and its sub-groups and help organize relevant meetings.

When needed, our future colleague will provide statistical support to users, notably data users, Commission services, the European Central Bank and other partners.
